

SHADE VARIATION

V1 Low Shade Variation

This number provides minimal to no shade and pattern variation among pieces from the same production run.

V2 Moderate Shade Variation

This number provides moderate shade and pattern variations. Each piece will vary, yet be similar to each other in colour and/or pattern variations. Each piece of tile may have different colours, patterns, and shades.

V3 High Shade Variation

This number provides high shade and pattern variations. The intensity of each colour will vary from tile to tile and may appear different from another piece.

V4 Random Shade Variation

This number provides random shade and pattern variations from tile to tile, so that one tile may have totally different colours from that of other tiles. Thus, the final installation will be unique.
